Gardening School

Series 20, Course 2

April 28-29, 2021

9:00 AM - 5:00 PM

Presented live on-line via

Sponsored by

Kalamazoo Garden Council, Inc.

NGC Gardening School Objectives

All gardeners can become accomplished horticulturists. To assist its members in achieving this goal, National Garden Clubs, Inc. created the Gardening Schools. A school is a series of four, two- day courses designed to:

- Stimulate interest in the growth of plant materials to their peak of perfection.
- Give the student an understanding of how and why a plant grows.
- Teach soil structure and methods for making the soil more productive.
- Provide an understanding of plants' reactions to certain weather conditions and how to modify these conditions to encourage optimal growth.
- Provide an understanding of commercial and natural fungicides and pesticides, growth regulators, and other chemicals used in general horticultural procedures.
- Illustrate methods for rapid propagation.
- Offer plant identification instruction.
- Explore growing techniques for garden plants, vegetables, fruits, houseplants, trees, shrubs, and specialized styles of gardening.
- Develop a respect for and appreciation of plants and their roles in our lives and activities.

Gardening Schools provide current information to those interested in horticulture and related topics. The curriculum has been developed by National Garden Clubs, Inc. (NGC), and is customized by the course instructors. Classes are open to the public as well as garden club members. Garden club members who complete the series of four courses (and pass the exams) are certified as an NGC Gardening Consultant.

Important Tech Requirements

All participants must have a desktop or laptop computer, tablet, or iPad with audio and video capability, and must attend a practice session the week before the course to confirm their ability to use Zoom. The date will be announced with registration confirmation.

Consultant Certification

The Consultant Certification Card is issued to NGC members after they have completed Gardening School Courses 1-4 with a passing grade of 70 or more on every exam. These four courses must be completed within seven years. Exams are optional. However, if you wish to become an accredited Gardening Consultant, you must take the exams. After passing two courses, a student will become a Provisional Consultant and join a Consultants Council. To remain in Good Standing, Gardening Consultants must continue their education by attending a GS Refresher or a GS Course every five years, no exam required. Following a Consultant's fourth refresher, the Consultant becomes a Master Consultant. Both Consultants and Master Consultants may earn refresher credit only once in a calendar year.

NGC Gardening School Series 20, Course 2

A detailed schedule will be sent to you upon confirmation of your registration. The schedule will include instruction, question periods, a review, and optional exam. All communication to registrants will be via email. The following topics will be covered:

Diseases and Pests

Irrigation and Water

Lawns and Alternatives

Fruits and Vegetables

Supplemental Subject TBD
