

*Michigan Garden Clubs
and Lynn O'Shaughnessy present:*

2023 Michigan Pollinators Engagement Calendar and Reference Guide

ON SALE NOW

\$20 includes shipping (US only)
limited time offer

This beautiful weekly engagement calendar is 5.5" x 8.5", spiral bound and features fascinating photos of 55 Michigan Pollinators taken by Lynn O'Shaughnessy.

Many of the pollinators were identified through BugGuide.net from the University of Iowa entomology staff and students. The tidbits of knowledge presented with each pollinator were gained from talks attended, and various accredited resources on pollinators as well as Lynn's own experience.

Start each week in 2023 with a delightful photo and tidbit of information on our Michigan pollinators engaging with Michigan Native plants. *

All proceeds will go to supporting MGC's Homegrown National Park initiative and President Monica Taylor's "Gardening with Nature" project!

Orders will be shipped at the end of November or early December. Order now as MGC will only print enough to fill the orders placed.

Order below. Deadline to order is November 10.

* Three pollinators are featured on non-native plants.
All plant material is identified.
