FLOWER SHOW PREPARATION

1. The Flower Show Schedule must be followed precisely as written. It is the law of the show.
2. The Committee advises that exhibitors condition all live plant material:
 - a. In the late afternoon or the evening before the show, cut specimens on a slant with a sharp knife or clippers. For thick heavy stems, crush the lower two inches if they are fleshy and green. If stems are woody (such as arboreal), give the stem numerous vertical clips.
 - b. After cutting, immediately put specimens in a bucket of tepid water; do not crowd them. Place in a cool, dark, draft-free location overnight. There may be exceptions to this. Please see conditioning and preparation suggestions for specific plants in Chapter 6 of the *Judges Handbook*, pages 55-56.
 - c. Leave foliage on the stem since it is needed to judge the health of the specimen.
 - d. After conditioning plant material overnight, re-cut stems under water just before entering specimen in the Flower Show.
3. Care for and groom specimens:
 - a. Start early to give your plants tender loving care: feeding and watering.
 - b. For additional information, please consult the *Judges Handbook*, or, if questions remain, contact one of the Chairs listed on page 3 of this Schedule.
